(54) COMMUNICATION TERMINAL, COMMUNICATION SYSTEM, AND COMMUNICATION DATA STRUCTURE

(57)Abstract:

PROBLEM TO BE SOLVED: To obtain a communication terminal, a communication system, and a communication data structure which reduce the user cost and are capable of displaying various images.

SOLUTION: The communication terminal is provided with a display panel 11 for moving image, having a high rewriting speed on the front side and is provided with a liquid crystal display panel 15 having a memory property on the rear side. Image data in the normal use mode (the telephone number of the other party or the like) is displayed on the display panel 11 for moving image, and a received still image is displayed on the liquid crystal display panel 15. As still image, an advertisement or a weather forecast and its sponsor, an image taken in from a digital camera, etc., are the examples. The communication data structure includes an image data part and a discriminator, which informs that

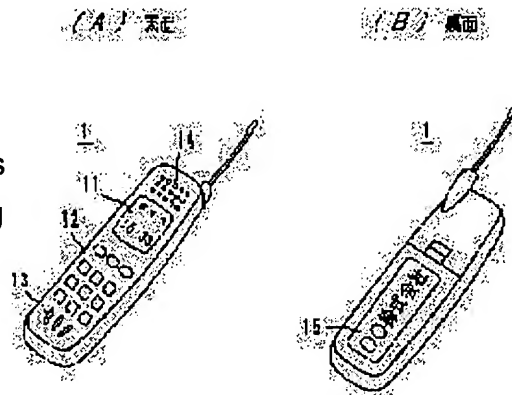

image data should be displayed on the liquid crystal display panel 15.
